📍 207/44/3, Sooripaluwa, Kadawatha, Sri Lanka. 🔗 [linkedin.com/in/subahu-rathnayake-92b516248](https://www.linkedin.com/in/subahu-rathnayake-92b516248)

PROFILE SUMMARY

Motivated Information Systems undergraduate with a strong interest in Business Analyst and IT project execution. Skilled in requirement gathering, process modeling (UML, BPMN), Agile collaboration, and task management (Jira, Trello). Possess a solid understanding of SDLC, organizational skills, and proficiency in Microsoft Office Suite (Word, Excel, PowerPoint, Canva). Recognized for proactive learning, effective communication, and problem-solving abilities in both independent and collaborative environments.

EDUCATION

UNIVERSITY OF COLOMBO SCHOOL OF COMPUTING,

2023 – Present

Bachelor of Science in Information Systems

Client Requirement Analysis – University Project

- **2nd Year Group Project: Vcare Vet Clinic Management System.**

- Engineered secure **user authentication and role-based access control** for multiple stakeholders, including vets, assistants, and store managers.
- Utilized **Draw.io, Figma, and GitHub** for system design, prototyping, and version control.
- Created **UML diagrams** (use case, class, activity, ER) to model system workflows and interactions, supporting structured documentation and stakeholder communication.

- **3rd Year Group Project: FixMe Vehicle & Home Services.**

- Collaborated with cross-functional teams to define and prioritize **feature requirements**, including real-time location tracking, technician wallets.
- Modeled system workflows using **UML diagrams** (use case, class, sequence, state chart), supporting structured documentation and stakeholder alignment.
- Applied the **Iterative Waterfall SDLC methodology**, managing feedback loops across development phases to ensure timely and quality delivery.

- **Task Board Management – Agile & Scrum Coursework:**

Organized sprints using Jira & Trello, tracked progress, and ensured timely delivery of team assignments.

- **UI/UX Collaboration – Figma Wireframes: (Hackathons)**

Partnered with peers to design and communicate workflows for system interfaces.
